# Introducing td.

By uniting **people**,  
**planet** and **technology**,  
we build and integrate  
software you'll love  
using.

**We  
want to  
succeed,**

**But  
not at  
all costs.**

# Hello World

TD believes that technology represents an investment in people, fostering communities and nurturing the planet.

# td.Consult

## Advisory & Consultancy

The knowledge and expertise you need at every stage of your digital journey.

Modernisation

Digitisation

Augmentation

Productisation

# td.Design

## High Fidelity Prototyping

Exceptional product design and user experience is part of a sustainable business strategy.

Prototyping

UX/UI

# td. Software

## Software Development

Whether you're a large business rethinking your business model or a start-up keen to get going, we have the knowledge and specialist skills to help.

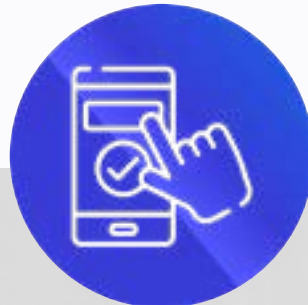

New product

Legacy application modernisation

API development & integration

Mobile app development

Maintenance & support

Top security is included at every stage, ensuring the safety of your applications and data

# td.Cloud

## DevOps & CloudOps

Get secure, robust and reliable cloud architecture on your choice of cloud platform while minimising costs.

Cloud architecture design

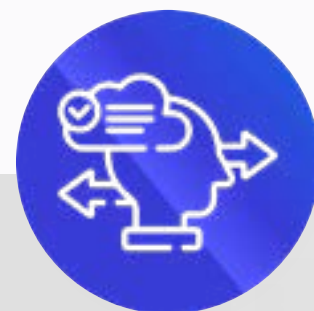

Cloud migration

Cloud Deployment

Cloud Support

CI/CD setup & support

Containerisation

# td.Quality

## Quality Assurance

Achieve your product’s vision. Meet defined design and performance standards with our thorough testing and recommendations.

# td.Connect

## Enhanced Visibility

td.Connect is a versatile and secure software solution that offers seamless integration, flexibility in development, intuitive user interfaces, and robust security measures, making it an ideal choice for businesses looking to streamline their software solutions.

### Connector Between Existing Solutions

td.Connect serves as a connector between existing software solutions, including legacy products. This capability allows for seamless integration and interoperability between different systems, streamlining processes and enhancing visibility and efficiency.

### Core API Functionality

At the heart of td.Connect are APIs (Application Programming Interfaces), which enable the development of bespoke solutions in a variety of front-end tech stacks. This flexibility allows for the creation of tailored solutions that meet specific business needs and requirements.

### Intuitive User Interface

td.Connect offers an intuitive user interface, making it easy for users to interact with the software. It provides a variety of base components that can be quickly customised to suit the business use case, enabling rapid development and deployment of user-friendly interfaces.

### Security and Control

Built to the latest industry standards adopted in the European and US markets, td.Connect prioritises security. It ensures that data and processes are protected while maintaining overall intellectual property and control for the user.

# Case Study

Revolutionising Telecoms:  
Streamlined Development for  
Global Growth and Scale

## The challenge

When we took over from an existing development team, the online platform wasn't finished – and needed a huge amount of optimisation. There were many separate, and siloed, internal systems and processes that needed to be analysed and understood on a global scale.

We needed to act as streamlined as possible to connect new and legacy systems, allowing them to talk to one another.

## The solution

After the handover and work undertaken to optimise the online platform, we took full control of all global software development operations for the client in the EMEA and USA regions. We collaborated with the existing in-house team to effectively facilitate the transition and onboarding process.

## The result

Through collaboration, the client has successfully expanded and scaled their worldwide ecosystem for telecommunications operators, fostering growth and scalability.

As their software partner, we continue to deliver their core product. We work closely with their external customers, including global mobile and wireline operators, to achieve this.

# Why Choose td.?

With our extensive portfolio of successful projects and a commitment to excellence, we are your trusted partner in driving growth and innovation.

# We are digital problem solvers at ❤️

The knowledge and expertise you need at every stage of your digital journey.
